

# East Windsor Regional School District

## About The East Windsor Regional School District

The East Windsor Regional School District (EWRSD) is a comprehensive public school district in Mercer County, New Jersey serving students in Kindergarten through 12th grade. The district serves a multi-cultural community with diverse income brackets. The district boils its vision down to three bullets:

- Increase student achievement by challenging each student to reach his/her highest potential
- Provide the professional staff with the knowledge, skills, resources and freedom to actualize the vision
- Measure student progress by determining the academic distance traveled by each student

The district is known for thinking outside of the box. With community outreach programs, online student/parent portals, adult education, and many other innovative programs to extend their reach the East Windsor Regional School District is constantly challenging their team to innovate.

## Objective

EWRSD wanted to expand their language program in order to increase the number of minutes a student is able to spend in language learning. Students in middle school received a session every other day while students in High Schools were only required to take two classes to fulfill their requirements.

In reviewing solutions and ways to implement, the district-in typical fashion-began thinking outside of the box. Rather than bring the student to the learning, why not bring the learning to the student? There were multiple ways to expose students to additional language learning opportunities without having to change their class schedules! Key opportunities EWRSD identified include:

- Using the cultural exercises from TELL ME MORE<sup>®</sup> for Social Studies
- Help address the State technology requirements by using the language software during technology classes
- Provide extra credit for taking multiple languages
- Online delivery allows students to use at home with their parents and extends the reach into the community

## Solution

Based on the requirements and program opportunities East Windsor Regional School District chose TELL ME MORE<sup>®</sup>, Education Online. This fully hosted online solution more than fulfilled all of the requirements and during the evaluation phase the solution stood out from the others being reviewed.

TELL ME MORE<sup>®</sup> Education Online will be rolled out district wide this year. Thusfar the teachers have embraced the solution with excitement. Success criteria for the program has been established and using the advanced tools within TELL ME MORE<sup>®</sup> EWRSD will be able to measure language skills retention and knowledge transfer. By combining the data from the software with overall student satisfaction East Windsor Regional School District will be able to demonstrate program success and continue to reinforce their innovative approach to learning.

"TELL ME MORE does it all! The software provides a new perspective to language learning through interactively reinforcing all of the content areas necessary to learn a language."

-Kathy Natalizio  
Curriculum Supervisor

## Objective

To increase the amount of time a student is able to learn a language.

## Solution

Auralog's TELL ME MORE<sup>®</sup> Education Online delivers a fully hosted, customizable online solution geared toward middle and high school students.

## Results

- Custom learning paths mirror in-class lesson plans
- Increased learning opportunities
